

Autumn Time

Easter Eggs

The Easter Bunny is on his way bringing chocolate treats for all (except the pets!!!).

Did you know that chocolate is toxic, and sometimes even fatal for animals?

The reason for this is that animals find it difficult to break down and excrete the Theobromine and Caffeine found in chocolate. These drugs cause constricted blood vessels, rapid and weak heartbeat, and stimulate the nervous system. Dogs are most commonly affected by chocolate poisoning due to the fact that they are more likely to help themselves to your chocolate stash and rapidly consume large amounts. Although dogs are the most susceptible, the toxin has been known to affect or kill cats, birds, rodents and reptiles as well.

If your pet has consumed chocolate it is best to contact us immediately. Your pet may start vomiting and have diarrhoea, 2 to 4 hours after intake and chocolate in the vomit may be obvious. Nervous system stimulation leads to hyperactivity, tremors, and seizures. The heart rate becomes increasingly rapid and irregular. Excessive urination may result from the diuretic (water clearing) action of the chocolate. Advanced signs include stiffness, excitement, seizures, and extreme response to noise, light,

and touch. Heart failure, weakness, coma, and death can occur 12 to 36 hours after intake.

Therefore, it's very important around Easter time to keep all your Easter chocolate treats stored somewhere where your pet can't get to. It's a great idea to explain to children that chocolate isn't for animals and they must not share them with the household pets. Additionally, you might like to buy some treats especially designed for your pet so they don't feel left out, or you can make your own. You can find recipes for 'Doggy Easter Treats' on our Facebook page.

Get Ready for the Chill!

Autumn is sometimes referred to as a "transition" season, spelling the end of the hottest time of the year and introducing the upcoming coldest time of the year. Although in Townsville the temperature doesn't usually drop all that dramatically, we still use these three months to get ready for winter.

After the mass eating and relaxing we all seem to do around Christmas, it's a common complaint that after the festivities are over, we find we need to lose a few kilos. Some people make New Year's resolutions to get fit and start eating better and others start getting back into their

health routine that was put aside for the holidays.

Have you ever thought that maybe your pet may benefit from losing a little Christmas pudding too?

Like us, as our pets get older, their joints get weaker and stiffer from the constant usage that day to day living requires. And just like us, if your pet is carrying a few extra kilos, this adds extra pressure to those already tiring joints. Throw into the mix the temperature drop we are about to get, and you have a recipe for mobility issues, joint pain and inflammation.

This is why we encourage all pet owners to start getting their pets back into optimal shape now, before the chill hits and causes those poor old joints to get stiff and sore. Let's face it, when the mornings and evenings are cool, you and your pet will be less likely to get out and be active. Starting an exercise routine now will get you and your pet in good practice and may help you to keep up the good work when your cosy, warm beds feel like the best place to be.

We all know that eating the right food goes hand in hand with exercise and losing weight. Just as you are trying to eat better, why not get your pets eating better too. We stock and recommend Royal Canin diets. We would be happy to help you select the right food for your pet's individual needs. You can also join our free in clinic weight

loss program, which gives you details on how much food to feed your dog and what percentage of body weight needs to be lost.

This is the Townsville City Council website for the off-leash areas:

Puppy Preschool

Puppy preschool is a great opportunity for puppies to socialise with other puppies during their critical socialisation period. We also cover basic obedience training. Puppies aged from 6 to 16 weeks are able to attend, with the requirement that the puppy has had their first vaccination. It is held indoors and is cleaned to make it safe for puppies without full vaccinations to attend.

Puppy preschool sessions run for 3 weeks on a Wednesday night from 6pm to 7pm. The cost of each class is \$20.00 per class or \$60.00 for the set of classes and is payable prior to or on the first class.

Bookings are essential. Please call us on 47257691 to book your pup in for the next class.

Puppy's First Groom Packages

Getting your haircut can be a scary experience when you are very young and this is no different for puppies. This offer is for puppies under 4 months of age that have never had a groom before. Puppies can feel frightened when experiencing new things so we like to take our time with them to make sure that it is as enjoyable and relaxing as possible.

Learning to be groomed at a young age can have a positive lifelong effect and will make future grooming appointments enjoyable and stress-free. Please call us on 47257691 to book your pup in for their first grooming appointment.

Consider Adoption

Are you considering adding a new furry friend to your family? Why not consider adoption? Adopting an animal gives them a second chance to find their forever home. Adoption agencies keep their animals up to date with vaccinations and the animals are generally desexed as well. There are many adoption agencies in Townsville and they can be easily found on Facebook or you can visit your local RSPCA.

Sunday	1 st April 2018	CLOSED
Monday	2 nd April 2018	CLOSED
Tuesday	3 rd April 2018	Normal trading hours

ANZAC DAY

Wednesday 25th April 2018 **CLOSED**

ANZAC day is a national day of remembrance to honour not only the ones who have fallen, but all the men and women who have participated in wars, conflicts and peacekeeping operations for our country and New Zealand.

*"They shall grow not old, as we that are left grow old;
Age shall not weary them, nor the years condemn.
At the going down of the sun and in the morning
We will remember them."*

LEST WE FORGET

LABOUR DAY

Monday 7th May 2018 **CLOSED**

Labour Day is a public holiday that celebrates the eight-hour working day; a victory for workers in the mid-late 19th century. The argument for the eight-hour day was based on the need for each person to have eight hours labour, eight hours recreation and eight hours rest.
